

Discover risks from dark data and learn how to address them

# Protect & Govern Sensitive Data Workshop

## Partner-led workshop highlights

 Understand the hidden compliance risks of dark data

 Assess your organisation's dark data risks with Data Risk Check

 Assess your environment against key data protection standards and regulations.

 Receive an analysis and report on findings and associated risks

 Learn about tools and services that can mitigate risks

 Explore recommendations and next steps

**80%** of corporate data is "dark" – it's not classified, protected or governed.<sup>1</sup>

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

### Address compliance risks head on

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

The **Protect & Govern Sensitive Data Workshop** gives you the insights you need to better discover, protect, and govern your corporate data.

**As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.**

By attending this workshop, our experts will work with you to:

Document your compliance objectives and strategy including compliant Teams deployment and use

Show how to understand, mitigate, and protect against potential privacy and regulatory risks from dark data

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

Provide actionable next steps based on your needs and objectives

## Protect & Govern Sensitive Data Workshop

# Data Risk Check uncovers data that can cause a compliance risk

The Data Risk Check is the core activity of the Protect & Govern Sensitive Data workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and surface privacy and regulatory risks in organisational data. Data Risk Check leverages automated Microsoft Purview tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.

The automated discovery process will analyse your existing data for:

- Sensitive information and intellectual property
- Unused or "stale" data
- Risky or suspicious activities

The Data Risk Check, in its core, will identify privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams, and can be extended with optional modules to scan on-premises data repositories and Windows 10/11 Endpoints.

## What to expect

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- ✓ Data Risk Check report that includes findings and insights from the automated discovery process
- ✓ A list of recommendations and actionable next steps that will help mitigate the identified privacy and regulatory risks
- ✓ Clear look into Microsoft's approach to mitigating and controlling privacy and regulatory risks.
- ✓ Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ✓ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

## Why CPS?

As a Microsoft Gold Partner, CPS works hand in hand with Microsoft to deliver expertise to protect your sensitive information and mitigate risks with Microsoft Purview. We will support the enablement and deployment of its core features to protect, manage and monitor your data and ensure it meets regulations and remains compliant.

We aim to amplify the benefits of every solution we work with, and not expect that one set of functions will fit all requirements. That is how we extract maximum benefit from Microsoft 365 and ensure a more secure environment for your organisation and employees. Our team of consultants, architects and project managers work with you to envision a secure modern workplace where your employees are empowered to work from anywhere, across devices, in a compliant, trusted and secure manner.
