

# Secure Identities and Access Workshop

## Workshop highlights

 Get a rating of your identity security posture and see how it compares to your peers

 Gain insights into apps used in your environment – even ones unsanctioned by IT

 Understand how to prevent identities from being compromised

 Learn how to reduce costs and improve business agility and security with simplified app access

“Identity and threat protection are high on customers’ minds. Getting identity right is a critical part of a Microsoft 365 project and is the first place we start. ”

-Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

Are you aware of suspicious user and sign-in behavior in your environment? Are you threatened by ongoing suspicious requests?

## Protect user identities

Identity is today’s control plane for digital transformation. Organisational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralised behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow’s data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

## Why you should attend

Given the complexity of identities, data, applications, and devices, it’s essential to learn how to ensure the right people are accessing the right information, securely. In this workshop, we’ll show you how identity is the fundamental pillars of an integrated security philosophy and end-to-end security strategy.

By attending, you can:

### Optimise identity

Identify potential risks related to identity and see opportunities for improvement.

### Assess security posture

Receive a numerical rating of your identity security posture and see how it compares to similar organisations.

### Reduce costs

Minimise expenses associated with password reset and helpdesk resources.

### Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

## What to expect

The foundation of cybersecurity is to quickly and accurately identify authorised users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorised users' identities so you can authenticate credentials and manage file access while still giving users the freedom to collaborate with others.

We'll work with you to:

- Understand your identity goals and objectives
- Define your existing and desired identity security posture
- Provide insights into applications used within your environment (sanctioned and unsanctioned by IT)
- Showcase core IT and user security scenarios through demos
- Develop a joint action plan based key results, recommendations and next steps

## We'll customize the workshop based on your organisation's needs

Design and  
Planning

Customer  
value  
conversation

Key results,  
recommendations  
and next steps

Demos

## Who should attend

The workshop is intended for security decision-makers such as:

- C-SUITE
- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Identity and or Application owners/decision makers
- IT Security
- IT Operations
- Security Architect
- Security Engineers
- Application business owners

## Why CPS?

As a Microsoft Gold Partner, CPS works hand in hand with Microsoft to deliver expertise for security, compliance and identity when you need it. We can support your security posture and help you find and mitigate, and safeguard against identity risks with a seamless solution.

We aim to amplify the benefits of every solution we work with, and not expect that one set of functions will fit all requirements. That is how we extract maximum benefit from Microsoft 365 and ensure you can assess the maturity of your current identity estate using Secure Score and application discovery tools. Our team of consultants, architects and project managers work with you to envision a secure modern workplace where your employees are empowered to work from anywhere, across devices, in a compliant, trusted and secure manner.
