SharePoint Vision and Strategy .

Microsoft SharePoint is a powerful and scalable tool that organisations are only just starting to understand and utilise. CPS' Vision & Strategy will investigate your current business requirements, show you what SharePoint can do, and roadmap how to achieve it.

Our Microsoft Certified Consultants will work with your team to provide a high-level overview and next steps document that outlines any business change required, the costs involved to implement the vision, a cost-benefit analysis, and the critical milestones necessary for deployment and rollout.

Our experienced team will discover, understand and present how SharePoint can benefit your organisation.

Discover: We will walk your team through an interactive, personalised demonstration of how SharePoint has been successfully deployed in other organisations, define your business objectives and discuss the measurable benefits sought.

Understand: Utilising our extensive product knowledge, we will offer structured guidance to show you how SharePoint can assist all areas of your business as we review your current usage and architecture.

Present: We will bring together your new understanding of SharePoint with best practice advice to produce a Vision, Strategy, and Roadmap that reflects your business objectives and aspirations.

OPTIMISE	**GAIN VISABILITY**	**COST REDUCTIONS**
Unlock the power of your existing deployment to reinvigorate your business	Make informed decisions based on accurate information	Identify cost savings

Our Approach and Deliverables

To help you understand what the options and possibilities are with Microsoft SharePoint, we will:

Discover and Understand:

Demonstrate what SharePoint can be used for then run an interactive technology workshop to demonstrate the features available:

- Provide examples of what other clients have built applications to do
- Show what SharePoint can be used for
- Discover what your business objectives are and the benefits you seek
- Stimulate possible business applications

Present:

Facilitate an interactive workshop designed to present:

- Our understanding of the current state
- A vision of the desired future state
- Provide a roadmap for adoption and next logical steps
